Penny - please send to file M/0035/002

Paul - Thanks for writing this up. he called me right after you. It seemed to me tha the had a copy of the 1976 plan and I told him it had been updated. I also explained to him that without a written concern, submitted with maps, it was very difficult to answer his questions and review the situation. I referred him to Rowan McGowan-Jackson.

His address is
Mr. Rod Dansie
7198 West 13090 South
Herriman, UT 84065
PH 254-4364

He would like to be notified of major KUCC actions, although I explained he would need to watch th public notices.

>>> Paul Baker 11/7/2006 10:24 AM >>>

I received a call today from a man named Rod Dansie who had several questions about Kennecott. He is an officer with an irrigation company in Herriman. He had a copy of the Board contract, and I believe he also had a copy of the 2003 reclamation plan. He asked several questions about Kennecott's permit area then got into specifics concerning requirements of the Mined Land Reclamation Act.

There was apparently a large storm that hit Butterfield Canyon in 1997, and he said a bunch of material from Kennecott's waste dumps came down the canyon with some of it settling in his field. Kennecott and Solid and Hazardous Waste did some soil sampling, but I don't know what came of it. He asked whether the Board contract would apply to this situation even though his property is outside Kennecott's permit area. I told him Kennecott would be responsible for effects caused by the mine whether or not they were within the permit area.

In the end, I told him to send us a letter and detail these circumstances if he wants us to take action. I told him to address the letter to you, and I also gave him your phone number.
